PROJ logo proposal

Nicolas Bozon
@cartogenic

This proposal is addressed to the PROJ community and project steering committee. It is a simple yet meaningful logo created to strengthen the visual identity of the OS project. It may also provide scalable design for any PROJ-related marketing activity.

CONCEPT

'Sphere On A Plane'

The initial idea is to depict PROJ software actual purpose visually, in the simplest form.

A sphere on a plane describes the projection of a globe on a plane map. It may also relate to geodetic transformations, cartographic projections and coordinate systems.

This logo shape is simple enough to scale to any size or resolution. Use it as a favicon, or print it on a giant banner.
